CHAN LEE

Robotics AI Engineer | Humanoid Autonomy & Agentic Learning
chandroidlab@gmail.com | chandroid-lab.github.io

RESEARCH & PROFESSIONAL EXPERIENCE

Georgia Institute of Technology | Visiting Researcher 2026.09–Present
Sehoon Ha Lab | Humanoid Robotics & Agentic Learning | Atlanta, GA

- Conducting research in agentic learning for humanoid robotics, with a research manuscript in preparation.
- Investigating learning-based approaches to humanoid autonomy and intelligent robot behavior.

NEUROMEKA | AI Robotics Engineer 2026.06–Present
Humanoid Robot | Seoul, Korea

- Developing and managing the official navigation stack for mobile humanoid robots.
- Focusing on spatial reasoning and semantic representations for autonomous exploration and navigation.
- Serving as part of South Korea's mandatory military service.

FLOATIC | Founder & CEO 2021.03–2026.04
Autonomous Mobile Robots | Acquired by Neuromeka | Seoul, Korea

- Led development, commercialization, and sales of warehouse AMR solutions for e-commerce operations.
- Raised $8M from investors including Hyundai Motor and NAVER; advised 20+ clients across logistics and manufacturing.
- Floatic was named to Forbes Asia 100 to Watch (2023).

NAVER LABS | Robotics Vision Engineer Intern 2020.08–2021.03
Autonomous Mobile Robots & Wall-Climbing Robots | Seoul, Korea

- Developed indoor vision modules for autonomous robots and supported systems integration; managed a modular wall-climbing robot project.

WOOWA BROS. (BAEMIN) | Robotics Engineer Intern 2019.10–2020.08
Outdoor Autonomous Mobile Robots | Seoul, Korea

- Developed outdoor delivery robot navigation and mapping/waypoint management, including 3D LiDAR field deployment.

KAKAO VENTURES | Deep Tech Research Assistant 2019.03–2019.08
Deep Tech Investment · Robotics & AI | Pangyo, Korea

- Evaluated AI and robotics startups and prepared deep-tech investment research.

EDUCATION & RESEARCH TRAINING

KAIST | B.S. in Mechanical Engineering 2016–2022
Daejeon, Korea | Degree conferred Aug 2022 | GPA: 3.60/4.30 (93/100)

- Hubo-Lab undergraduate research (2020): object detection and semantic segmentation.
- Relevant completed coursework: Introduction to Programming (S), Linear Algebra (A); undergraduate research in robotics.

SELECTED HONORS & RECOGNITION

Forbes Asia 30 Under 30 (2024) • Next Generation Engineering Leader Award, National Academy of Engineering of Korea (2023)
Forbes Asia 100 to Watch — Floatic (2023) • KAIST Outstanding Achievement Award (2018) • KAIST Undergraduate Research Program Best Poster Award (2018)
Talent Award of Korea, Deputy Prime Minister's Award (2014) • MAWHIBA 4th Award, Intel ISEF (2014)
